ABOUT

We are an agile software development company who listens to the client's users and collaborates with their internal teams so as to deliver a scalable and lovable product.

We help startups and firms to create and improve their products with our agile development approach focusing on web, mobile, big data and Machine Learning technologies. Being more than simply a tech company, we aim to reach the best solution in collaboration with our customers' internal stakeholders

Our team members have over 10 years' experience in analyzing, designing and building web and mobile apps.

PRODUCT TEAM

We boast a strong team of software developers, architect designers, business analysts, QA engineers and project/product managers.

AGILE MINDSET

At agileful, every operation is carried out with an agile mindset to be able to provide flexible services of the highest quality and as quickly as possible.

TECHNOLOGY

If you want to build something modern and for the future, it is important to also use the latest technologies. Your product should be scalable to be used by millions of users, it should be fast enough to gain the users satisfaction and interesting enough for developers to be able to extend your in-house team easier.

PROJECT MANAGEMENT

SPRINT PLANNING

Every sprint starts with backlog assessment and prioritisation.

DAILY STANDUPS

We keep everyone on the same page and promote quick decision-making with daily standups.

DEMOS & INTEGRATION

We continuously integrate completed sprints while providing intermittent demos for you to provide feedback on.

After every sprint we look back and identify possible points for improvements.

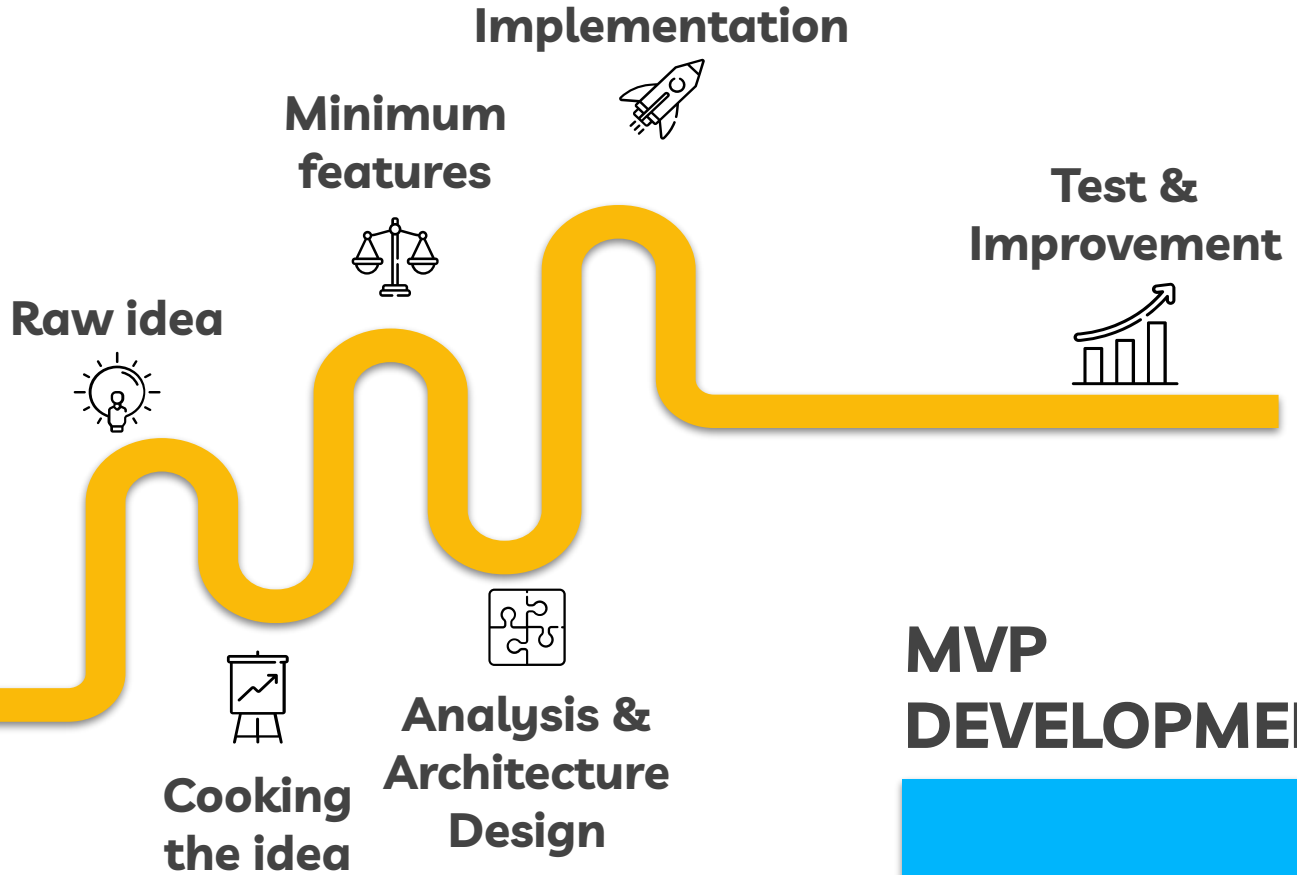

SPRINT RETROSPECTIVES

At the end of each sprint we inspect the progress and adapt the product backlog if needed.

SPRINT REVIEWS

We help you build a Minimum Viable Product (MVP) in order to acquire users and test your idea.

The MVP, together with a proper product testing, helps you approach investors and scale up your business.

If you already have a small team but you are not sure if this is the team that can scale up your tech, we are here to train and scale up your team. We help your team to refine the tech if it is required.

Redesign for a scalable architecture

Extend Your Team

Coaching & Consultancy

Agile

We coach you to create an agile environment in your company right from beginning

Scalability

We consider scalability in matter of technologies and product at every step

SEAMLESS SOLUTION

From product, tech & devs to team building and scaling up we provide a seamless & integrated soluti

It is very critical for your business who take over the responsibility of the tech team. With our experienced tech engineers and consultants, we help you to find the best fit

IN-HOUSE Tech Leads / CTO

To make a positive change, your tech team need to trust the process. We know how to communicate and convince your tech team with our skills and conventional communications.

Communication & Trust

ONBOARDING

When you begin on-boarding your customers, we'll be on standby for hotfixes.

SET-UP

We'll help you get setup with your new product and show you how to manage it.

BUG-FIXING

Free support and bug fixing for four weeks after delivery of your product.

DEBUGGING

We'll detect and remove existing and potential errors in your product.

NEW FEATURES

We'll assist you in designing and developing new features for your product.

CONSULTANCY

Any questions you may have, our team is ready to answer them quickly.

SUPPORT

Six months
guaranteed support

TRANSPARENT PRICING & PAYMENTS

No hidden costs
Pay as you deliver

PUNCTUAL DELIVERY

Start on time
Delivery on time

GERMAN & INSURED CONTRACT

We sign German contract with
Insurance coverage, up to 3
million euro

EUROPE BASED SUPPORT

Meetings in Berlin or anywhere in
Europe
Free online & phone calls

CONTINUOUS Q&A, TESTING, FEEDBACK

Quality is our top priority. That's why we do extensive quality assurance testing. We welcome your feedback at all times and use different research and testing methods, tailored to the type of feedback that we're looking for.

COMMUNICATION & MANAGEMENT TOOLS

We use modern communication and management tools to manage the project and keep you updated about the progress.

EXTENSIVE QA

Quality is our top priority. That's why we do extensive quality assurance testing.

TRANSPARENT DOCUMENTATION

We deliver your final product with comprehensive and understandable documentation.

WRITING TESTS & CLEAN CODE

We deliver clean code and regularly schedule writing tests.

TRAVEL & TOURISM web app

July 2021 - now

<https://turio.it>

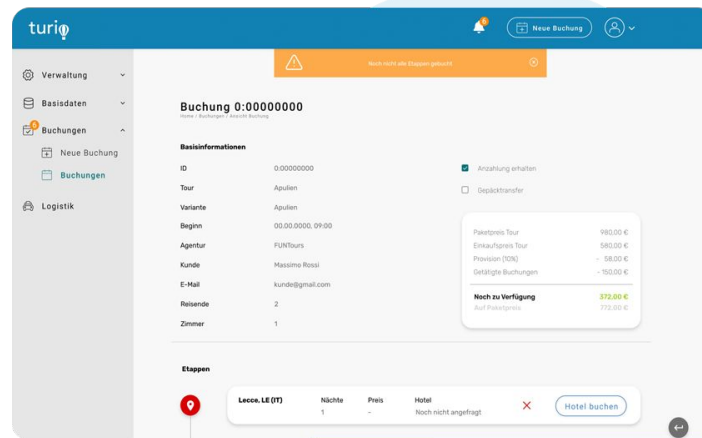

ABOUT:

Turio is a complete and complex tours and travel packages management provide SaaS solution for all travel agencies around the world.

Main Features (SaaS):

- Complex and flexible access management
- Tenants, agencies management
- Hotel, flights, tickets and inventory management
- Tour and packages management
- Transport system
- Billing and invoicing
- Dynamic pricing system

EDUCATION & E-LEARNING web app & ML

December 2020 - May 2021

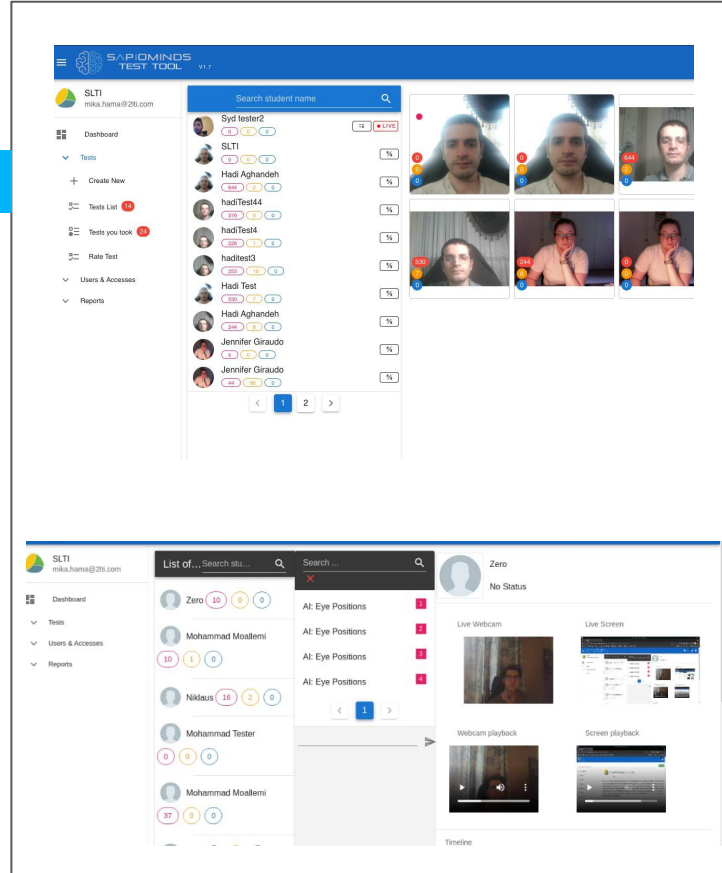

<https://Sapiominds.com>

ABOUT:

Sapiominds a platform provide testing tool for language institues and universitie. With our CloudML solution we helped them to monitor the testers with video and screen live streaming solution and applying image processing and AI solutions to add proctoring to their testing app.

Main Features (Cloud ML & Web App):

- Video live streaming
- Screen live streaming
- Face recognition
- Motion capture
- Live event notification
- Proctoring dashboard

Autonomous Driving mobile app

February 2019 - April 2020

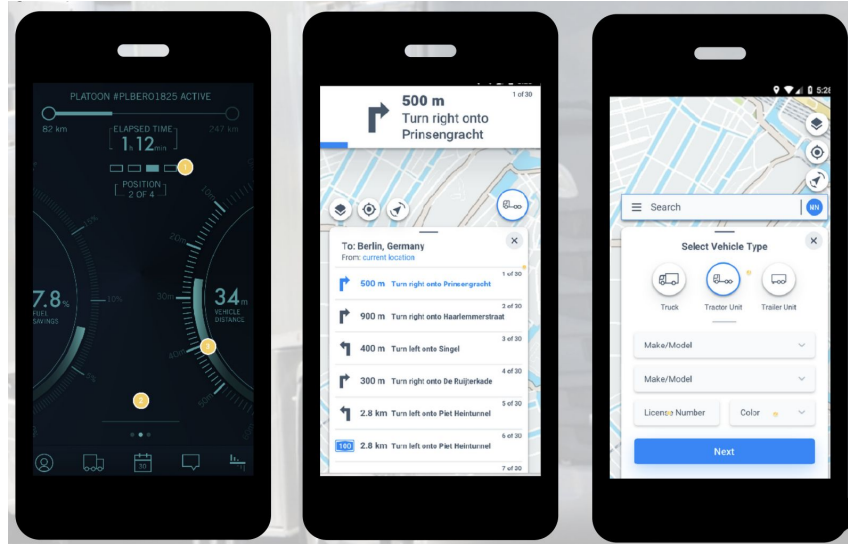

<https://fleetspark.ai/>

ABOUT:

FLEETSPARK, a Berlin-based Startup with a logistic solution that enables on-demand platoon and driver matching for trucks across manufacturers and trucking companies. It's Waze for truck drivers.

Main Features (Web App):

- React Native App
- Native iOS and Android Navigation app (not using google map or any other ready maps)
- Recording all driver activities log (speed and acceleration and etc.)

“Trust them! They give the right advice to help clients make the right decision”

Agilegul has been doing software development for our machine-learning product. They host everything in the AWS infrastructure and also work on Node.js, Python, PyTorch, SPARC, TensorFlow, PostgreSQL, and API gateway. We also work collaboratively on the platform's frontend using Figma. Their contribution to our project is outstanding and they feel like a part of our company. Project management is good; we work in a scrum environment, and we've had no issues with their staff. Thanks to them, the quality of our services increased by 50% upwards

thalox

Falk Von Rönn
Product Owner

“Agileful has become an essential part of our engineering team”

“Agileful has become an essential part of our engineering team. After an initial trial we expanded the team from one to four dedicated software developers; working on Elixir/Phoenix, Ruby on Rails, JavaScript and Front-End Development. With our tight budget it was impossible to reach this point without him and his team.”

clubcollect

Philip Poots
VP of Engineering

“They care about metrics and success”

“agileful has helped me develop the MVP and provided me with front-end and back-end development work. They cared about my metrics and success. I’ve never seen an outsourced company so understanding and concerned about my cost. The flexibility they offered was also great.”

**Kaessra
Schneeberger
Founder & CEO**

“We were delighted by how fast Agileful provided support!”

“agileful has supported us expanding our software development capacities by extending our react.js team at their offices. We were very delighted with how fast TalentBridge Team provided us with the needed support, once we approached them.”

The logo for 24metrics, featuring a stylized red '24' followed by the word 'metrics' in white lowercase letters.

24metrics

A photograph of Sven Hezel, a man with short dark hair, smiling and wearing a grey sweater over a dark collared shirt. He is sitting on an orange couch in an office setting with shelves in the background.

Sven Hezel
Managing Director

“The developers were incorporated into our agile development environment”

“The agileful team has supported us in building our MVP App for both iOS and Android. The TalentBridge developer was incorporated into our agile development environment making the collaboration with our UX and Product Manager smooth and efficient.”

FLEETSPARK

**Dr. Navid Nourani
Vatani
Founder & CEO**

“Our CTO in residence made the impossible possible”

“agileful CTO, Sajad, made it possible with his team to build our complex product (MVP) including web crawling, data mining and Machine Learning solutions. They build a scalable app using micro-services declared by AWS official experts in a very well designed architecture, delivering in 2 weeks sprints but deploying several times a day to be tested and considering feedbacks for further development. With our tight budget it was impossible to reach this point without him and his team.

<jahan.info/>

Rooh Savar
CEO

“Impressed with how they’re able to consistently meet our expectations”

Agileful helped us in building our functioning website to rent clothes and we got positive feedback. They always deliver on time, stick to the budget, and they’re very receptive whenever we have any concerns. If I were to give a grade on their performance impact, it would be above 75%.

CODRESSING

**Floriane
Palussiere
CEO & Founder**

“Agileful team is client-centric and their flexibility is amazing”

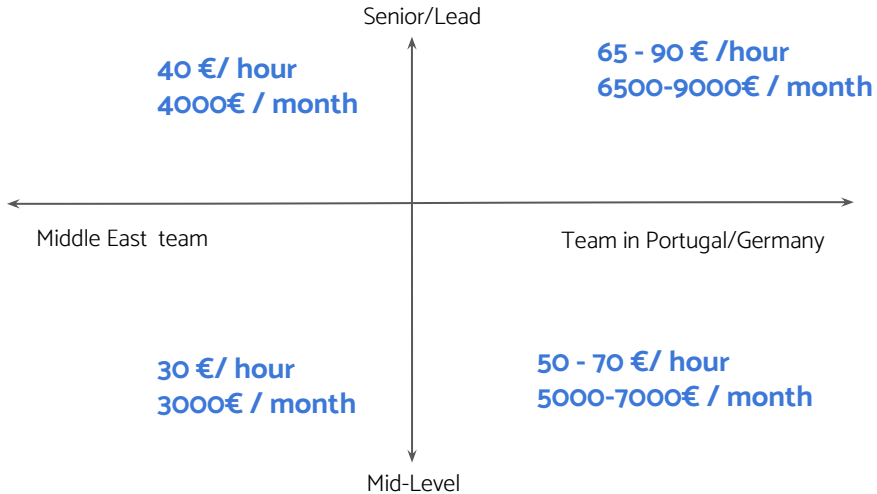

We needed to outsource our MVP development work to a team that was flexible in understanding our needs. Agileful helped us to launch 2 products in 2 months and move as rapidly as we do. They quickly figured out what we're doing, how can improve product design processes. We mainly needed their help with frontend work, so they used JavaScript and React, along with a bunch of other frontend languages. Eventually, we also needed their backend services, so we used Node.js and AWS... . As a result, we'll still be working with them in the foreseeable future.

**Sherzod
Abdujabborov
